

# Print what matters

On-demand, to anywhere

## Local Copy Shop

- **Get Back Your Time** - Quicken the speed of building, proofing, and distributing documents through a single online content library. Upload, proof, and order online in less than 5 minutes
- **Scale Anywhere, Instantly** - Mimeo produces and ships content on-demand, to any location for delivery as soon as next-day. Create stunning graphics and documents and have them in all your global locations tomorrow.
- **Get Instant Quotes** - Mimeo's real-time pricing tool provides instant quotes, reflecting what features were added and removed from the document.
- **One Stop Shop** - Order more than just print. Users have access to non-paper, promotional items that can be bundled, kitted, and shipped together with document orders.

- **Submit Files... and Wait** - Local copy shops lack the convenience of an online content library. Customers must manually upload files and wait for proofs. Only to later ship documents, costing not hours but days.
- **Print Here, Ship Here** - A copy shop is a copy shop. Not one of Mimeo's print production facilities with strategic carrier partnerships. After the proof is approved, copy shop staff must print and hustle to ship your documents.
- **Pricing Uncertainty** - Schedule time to email or call about the scope of a project to receive a quote. The same project may vary in cost day to day.
- **Merchandise Shortfalls** - Have a branded promo item that you need to order? A copy shop doesn't have the capacity or inventory insight to stock all the items you need when you need them.
